

Mohamed Kaba

+1 770-757-4763 | Kaba4444@live.com | [LinkedIn](#) | [Projects](#) | Atlanta, Georgia

Systems Engineer with 3+ years of experience designing, managing, and supporting enterprise on-prem and cloud infrastructure. Proven ability to improve uptime, reliability, and performance by proactively resolving server, network, and infrastructure issues across hybrid environments. Experienced in AWS and Azure environments, with a strong focus on automation, scalability, and secure infrastructure design.

PROFESSIONAL EXPERIENCE

Systems Engineer **Tokio Marine HCC.** Atlanta GA (www.tmhcc.com) February 2026 – Present

- Deployed, automated, maintained, and managed AWS and Azure infrastructure to ensure security, performance, and availability of production systems. (Compute, networking, storage, IAM, databases, and serverless architectures)
- Collaborated with stakeholders to gather requirements and translate them into scalable, secure AWS/Azure solution designs
- Supported multi-account cloud environments using AWS Organizations, Landing Zone frameworks, and Service Control Policy (SCP) guardrails reducing operational costs by 30% and improving scalability.
- Executing cloud and identity integrations across Microsoft Entra ID (Azure AD) and M365 environments.
- Implemented CI/CD pipelines using AWS and Azure tools, reducing deployment time by 50% and improving release reliability.
- Architected cloud migrations for 50+ legacy apps, optimizing performance, scalability, and cost efficiency.
- Identified root causes of critical platform issues and incident reports, coordinating engineering teams through structured resolution steps; implemented multi-cloud disaster recovery solution, reducing failover time by 60%
- Provided mentorship while developing documentation and automation-ready deployment guides to support internal knowledge base and ensure consistent standards.

Network Technician **Lightedge Solutions** St Louis MO (www.lightedge.com) June 2023 – February 2026

- Increased server capacity by 40% using VMware virtualization and supported enterprise infrastructure (Windows, Linux, networking) for 500+ users with 99% uptime.
- Integrated AWS/Azure with on-prem systems, improving efficiency by 25% and resolving complex connectivity issues through troubleshooting.
- Improved disaster recovery by reducing backup recovery time by 60% through enhanced monitoring and maintenance.
- Enhanced security and reduced costs by implementing MFA for hundreds of users and saving \$10K+ through hardware reuse and decommissioning.

Technical Support Analyst (seasonal) **Anthology** (www.anthology.com) April 2023 – June 2023

- Provided technical support, troubleshooting hardware/software issues and performing installations and configurations
- Resolved 50+ tickets weekly with a 95% customer satisfaction rate through efficient troubleshooting.
- Delivered high-volume end-user support across multiple channels, ensuring timely resolution and system stability.

EDUCATION

Bachelor of Science in Cybersecurity Dean's List Kennesaw State University, 2023

Certifications

AWS DevOps Engineer Professional | AWS Solutions Architect Professional | AWS Security Specialty
AWS CloudOps Engineer Associate | AWS Certified Solutions Architect Associate | AWS Developer Associate
Azure Administrator AZ 104 | CompTIA Network+ | Red Hat Certified System Administrator | CCNA

TECHNICAL SKILLS

- AWS Cloud: EC2, S3, RDS, VPC, IAM, Lambda, Auto Scaling
- Azure Solution Architecture and Design
- Networking & Infrastructure: LAN/WAN, routing, switching, DNS, TCP/IP, VPNs, firewalls, load balancing
- Cloud Security & Governance: IAM, RBAC, AWS Organizations, Service Control Policies (SCPs)
- Automation & Scripting: Bash, PowerShell, Java (basic), SQL (queries, schema design)
- Cloud Compliance & Monitoring: Audit logging, security guardrails, compliance fundamentals
- DevOps & CI/CD: Pipeline implementation, hybrid cloud architecture, infrastructure standardization
- GitHub actions for repeatable deployments
- Infrastructure as Code: Terraform, ARM templates, automated provisioning
- Containerization: Docker, Kubernetes, EKS/ECS, microservices architecture
- Support & Incident Response: Infrastructure support, troubleshooting, root cause analysis
- Performance tuning, technical documentation, stakeholder collaboration, and infrastructure standardization.
